WHO WE ARE

CLEANING UP SPILLS SINCE 1985

1985 CENTRAL PENNSYLVANIA

New Pig is a US-based company that got its start in the Central Pennsylvania town of Tipton. Our company headquarters and manufacturing facilities are there to this day.

1993 EUROPEAN EXPANSION

In 1993, New Pig established its first European presence with an office and distribution facility in Glasgow, Scotland, serving the whole of the UK.

2006 WORLDWIDE PRESENCE

By 2006, we expanded our reach to over 70 countries! More than 300,000 industrial, commercial, retail and healthcare facilities worldwide are choosing PIG to solve their leak and spill problems.

TODAY IN THE UK

Here in the UK, we've hit our 25-year milestone helping you keep your workplace clean and safe. Our team knows and understands the local market and is proud to bring the World's Best Stuff for Leaks, Drips and Spills into new UK workplaces every day.

THE POWER OF PIG

As you browse through this catalogue, you'll notice a wide variety of the brand customers worldwide know and trust — PIG! WORLD'S BEST STUFF FOR LEAKS, DRIPS AND SPILLS.

DON'T SETTLE FOR LESS.

CLAY IS HEAVY

Bulky and hard to carry

1 bag weighs up to 20kg

Messy and time consuming to clean

Clumpy, wet clay must be swept and shoveled into waste containers, wasting precious productivity

Expensive

Absorbs only 1x its own weight, plus the heavy, bulky waste costs 10x more for disposal

Dusty

Breathing clay dust poses health hazards

Potentially damaging to floors

Rough granules can damage expensive coated industrial floors, get stuck in machinery

RENTAL RAGS ARE DIRTY

Can be contaminated with metal

Heavy metal and metal chips can get transfer onto hands and into eyes or mouths

Not environmentally friendly

Require aggressive laundry detergents for cleaning

Trip and fall hazards

Thick rag material blocks the wheels on equipment and creates tripping hazards

Expensive

High replacement costs when rags are damaged, lost or thrown away

GRANULES ARE MESSY

Inefficient

Requires lots of effort and labour to use

Wasted product

You typically pour more than you really need

Tracks through your facility

Sticks to shoes, machines, products and the floor, creating more to clean

Can only be used once a spill has occurred

Not suitable for preventive use

CHOOSE THE BEST!

PIG MAT IS THE SUPERIOR SOLUTION

When you're dealing with leaks and spills, you want fast, effective response. You want Pig Mat! While other spill response options create even more problems for your workers (see Clay, Rental Rugs and Loose at left), Pig Mat handles spills quickly and efficiently.

IT'S LIGHT

Lightweight and easy to manage

No sweeping or heavy shoveling necessary!

Efficient and Inexpensive

Absorbs up to 10X times its own weight— save money by using less product and paying less in disposal costs

Dust-free

Leaves no dust or dangerous fine particles in the air

Safe on floors

Nonabrasive; doesn't harm finished floors or damage expensive machinery

IT'S CLEAN

100% Polypropylene

Material is safe to handle and won't rip, tear or fray, even when saturated

Thin mat is super absorbent

Performs best when lying flat thanks to superior wicking properties throughout the mat

IT'S NEAT

Simple to use

Lies flat and absorbs spilled liquids for you; simply pick up and throw away when fully saturated

Use only what you need

Easy-tear perforations let you take only what you need, so you use less mat and save money

Good for preventive use

Can be placed in areas with high spill and leak potential to be prepared before a spill occurs

PIG Absorbents work as hard as you do.

Adhesived-backed PIG Grippy® Floor Mat sticks tight but peels up easily. Won't shift or bunch up.

MAT32100

PIG Grippy Mat has full-coverage adhesive backing.

- Holds tight, leaves no residue
No need for tapes and trays.
- 8-layers of fine-fibre polypropylene
Absorb leaks, drips and overspray.
- Lies flat to reduce trip hazards
No bunching or curling.
- Liquidproof barrier
Bottom layer keeps floors completely dry.
- Zigzag-stitching
Safer, high traction surface.
- Spunbond top layer
Stands up to foot and light wheeled traffic.

SUPERIOR TECHNOLOGY
INSIDE AND OUT

Poly backing stops liquid and adhesive backing holds tight with no residue. Spunbond top layer stands up to foot traffic. Zigzag stitching adds strength.

IT ONLY TAKES ONE SPARK

You can follow guidelines, comply with regulations, bond and ground every tank, fuel pump and container, but one simple fact remains: static electricity hides in plain sight and all it takes is one spark for disaster to strike — especially when there's a spill.

Refueling and liquid transfers create spills, so it makes sense to use absorbents in these areas to conform with environmental standards. The problem with conventional oil absorbents is that they're made from polypropylene — a plastic — and naturally carry a static charge. Independent testing shows that these

absorbents can carry a charge large enough to spark an explosion just by pulling one out of the bag. That's why using conventional oil absorbents around flammable liquids puts people in real danger.

The only way to be sure an absorbent is safe to use around flammables is to use one designed specially for static decay and surface resistivity, like PIG Static Dissipative socks, pads and rolls!

There also is a significant potential for shipping and handling to cause friction between the plastic bag and the absorbents inside — resulting in static charging. PIG Stat-Mat is packaged in bright pink, static-dissipative plastic that is similar to the packaging used to protect microconductors and electronics from static.

MAT214

PIG Stat-Mat

Safely absorbs fuels and solvents.

Specially treated to reduce risk of electrostatic discharge; packaged in static-dissipative bags to reduce static charge build-up. Passes NFPA 99 standards for static decay and surface resistivity.

PIG Loose Absorbents are cleaner, safer and more efficient than clay.

Some messes clean up better with loose. With lightweight, highly absorbent, chemically resistant options, we've got you covered! You'll NEVER have to resort to clay.

- Spend less time and money **cleaning up spills of oils, coolants, solvents and water** with PIG Universal Loose Absorbents.
- Our Loose Oil Absorbents are **perfect for oil spill clean-up** without taking on a drop of water.
- PIG HazMat Loose Absorbents are specially formulated to **stand up to corrosive materials**.

Six reasons to stop using clay and switch to PIG Loose Absorbents!

- ① Clay doesn't absorb. It just becomes coated with liquid that can seep through.
- ② Clay is heavy: A bag can weigh 18–22kg — and it's hard to carry, sweep and shovel.
- ③ It is abrasive. Gritty particles can damage machine parts.
- ④ Clay sticks to your shoes. So you end up tracking it all over your site.
- ⑤ It's a health hazard. Some clay contains silica that can cause lung damage.
- ⑥ Disposal is expensive, messy and labour intensive.

PIG Wipes are top quality
for jobs from polishing to
rough scrubbing.

For a perfectly manufactured, clean and dependable product every time, PIG Wipes can't be beat. Use the chart below as a guide to picking the best wipe for your needs.

Look for these icons. The higher the number, the more you can expect from your wipe.

- 100** **#100 Ultra-Duty** can be used all day and provide the highest levels of abrasion and solvent resistance.
- 70** **#70 Heavy-Duty** provide the extra toughness you need for jobs like wiping rough parts, gears and sprockets.
- 40** **#40 & #35 Medium-Duty** deliver a balance of toughness, absorbency, and economical cost per use.

Ultra-Duty

SPILL KITS

Choose the type of kit according to your liquid.

Universal

Also called MRO absorbents, these soak up the widest range of everyday liquids: oils, coolants, solvents and water

Oil-Only

PIG Oil-Only Absorbents absorb and retain oils and hydrocarbon-based liquids, without soaking up a drop of water

Chemical

PIG HazMat absorbents are specially treated to soak up acids, caustics and unknown liquids

ATTENTION: Independent testing indicates that PIG® HAZ-MAT products are compatible with and absorb most acids and caustics. Due to variables and conditions of applications beyond our control, New Pig cannot guarantee that this product will absorb to your satisfaction. To ensure effectiveness and your safety, we recommend that you conduct compatibility and absorption testing of your chemicals with PIG® HAZ-MAT products prior to purchase. If you have any questions or need samples to test, please contact your local distributor.

There's a PIG Kit to handle any size spill.

PIG Spill Kits come in a variety of absorbencies and are arranged in this catalog by container type.

SPILL RESPONSE IN FIVE STEPS

On Water

Position booms downstream with enough slack to float freely or angled from water flow to channel oil.

1

Put on proper personal protective equipment.

2

Overlap socks to contain spill. Use multiple layers for large spills.

3

Place absorbents from the outside in.

4

Use **A** mats for maximum coverage, **B** pillows for maximum absorbency.

5

Dispose of used absorbents in yellow bags.

Three PIG-proven ways to protect drains and control liquids.

1. COVER DRAINS

PIG Original DrainBlocker Drain Cover

- Seals tight to keep out unwanted liquids
- Won't rip, tear or stretch when you pick it back up
- Use for fast spill response
- ◆ **Helps you comply** with Environmental and ADR regulations

See page 91

2. CONFINE & CHANNEL LIQUIDS

PIG Original SpillBlocker Dike

- Flexible and formable to the shape of the spill
- Tacky bottom layer seals tight so no liquid seeps underneath
- Confines spills or channels washdown liquids without absorbing them
- ◆ **Helps you comply** with Environmental and ADR regulations

See page 96

3. SEMI-PERMANENT CONTAINMENT

PIG Build-A-Berm Barrier

- Configure a custom barrier to fit your leak-prone areas
 - Pliable foam barrier springs back to shape so you can roll wheeled equipment right in
 - Big savings compared to building cement or angle iron curbs

PIG Leak Diverters protect your workplace from overhead leaks.

- **Provide protection**
Diverters can help protect employees, equipment and inventory
- **Temporary fix**
Catch and control leaks until you can make repairs
- **Keep floors dry**
Leaks cause wet floors, which cause slips and falls
- **Stay prepared**
Keep a Leak Diverter on hand before you need one to avert disaster

LEAK DIVERTED, CRISIS AVERTED

Why choose PIG?

Only PIG Leak Diverters deliver the top-quality and wide selection that can keep you covered in any situation.

Here's how it works...

3 TYPES OF PIG LEAK DIVERTERS:

What type do you need?

FOR ROOFS – SEE PAGES 102–105

PIG Roof Leak Diverters hang in problem spots to catch nuisance leaks and protect your people, equipment and inventory.

Quick Control Leak Diverters install even faster! See pages 104–105.

FOR PIPES – SEE PAGES 106–107

PIG Pipe Leak Diverters hang easily to catch and divert leaks and condensation.

FOR CEILINGS – SEE PAGE 106

PIG Ceiling Tile Leak Diverters install in office areas for low-profile protection that won't get in your way.

PIG Trough and Sloping Style Leak Diverters

Protect your people and equipment.

Trough style diverter's long rectangular shape catches and channels leaks or condensation along cracks, fissures or pipes. When fitted around pipes with attached hook-and-loop strips, the sloping style diverter's natural slope helps it catch and channel leaks to a drain or container.

PIG Pallets and Decks are best in class.

We understand what you need and build it into every product: That's the PIG Quality Advantage. Our pallets and decks offer features you won't find anywhere else!

1. Unsurpassed Strength:

Every PIG Pallet and Deck is built to support the maximum load long-term. Even fully loaded, our products won't bow, buckle or break!

2. Thickest Grates on the Market:

Anti-slip structural grates on our Heavy-Duty Pallets add incredible strength - ours won't bend like cheaper alternatives!

3. Lowest Loading Height:

A low pallet height means less effort to load and unload drums safely on and off the pallet.

4. Proven Chemical Compatibility:

Our pallets and decks are compatible with every type of non-flammable liquid you need to store, whether it's corrosive, oily or anything in-between.

5. Rigorous Testing:

We subject all of our products to more punishment than you can ever dish out, so you can be sure that, when we say a pallet can stand up to a 4,000 kg. load, it can.

PIG ESSENTIALS CONTAINMENT!

Safely store hazardous liquids

Affordability is the key feature of our PIG Essentials line of containment products. Keep your workplace safe and secure by properly storing and securing your drums.

PIG Poly Spill Pallets
Strong and economical.

These 100% polyethylene spill containment pallets are strong enough to support fully loaded steel drums. Resist UV rays, rust, corrosion and most chemicals.

PIG® Grippy® Absorbent Mat Notice

New Pig adhesive-backed mats are formulated to work with most common industrial and commercial floor surfaces but are not intended for home/residential use and wood flooring. All adhesive mats have some potential to leave residue or lift or discolour finish coatings, paint, and loose or pre-damaged tiles depending on the condition and age of the floor surface. If you have questions about the suitability of New Pig adhesive-backed mats for your application, test a 15 x 15cm piece in a non-critical area before use.

PIG® Grippy® Floor Mats should be replaced if they become saturated or show signs of wear or damage.

Customer assumes the risk that a New Pig adhesive-backed mat may damage or alter their existing flooring or floor covering. Other than warranties implied by law, New Pig provides no warranty of fitness for a particular purpose and no warranty that an adhesive-backed mat will be fit for customer's intended use. Other than in respect of liability which New Pig cannot lawfully exclude, New Pig shall have no responsibility for, and customer hereby releases and discharges New Pig from, any direct, indirect, incidental or consequential damages to their floors, flooring material, or any other surfaces in their premises. Customer is solely responsible for determining the fitness and appropriateness of the use of New Pig adhesive-backed mats in their premises.

PIG Roof Diverter Bucket Kit

Grab it and respond to the leak.

Portable bucket contains supplies for rapid leak response. Can also be hung in problem spots and act as a drainage container.
