# PRODUCT DATA SHEET

| | | |
|---|---|---|
| **Item Number** | : | OB13X3 |
| **Item Name** | : | PIG® Essentials Oil-Only Boom |
| **Liquids Absorbed** | : | Oil-Only |
| **Contents/Package** | : | 4 booms/package |
| **Colour** | : | White |
| **Dimensions** | : | 13 cm x 305 cm |
| **Composition** | : | Polypropylene Filler/Polyester Netting/Metal Hardware |
| **Absorbency** | : | 114 L/Package |
| **Weight** | : | 10 Kg |

**Description**

- Strong mesh outer sleeve encases a poly sock skin filled with highly-sorbent polypropylene; filler won't shed and Booms won't sink, even when saturated with oil
- Polypropylene filler is left in its natural hydrophobic state — repels water (and floats) while only absorbing oils and other hydrocarbons
- A nylon rope and sturdy hardware ensure long-lasting durability and easy retrieval
- Durable, easy-to-use connectors provide a simple and efficient way to link Sock/Net Booms together and create a containment system big enough to handle almost any size spill on water
- White colour makes it easy to see when it's fully saturated — you save money by not throwing it away too soon

| | | |
|---|---|---|
| **Warnings & Restrictions** | : | When sea-weather condition is wind speed >5 knots & a (perpendicular) water-current speed >2 knots, this can cause oil absorbent booms to submerge, allowing oil to pass over them. Waves higher than freeboard (above water) portion of boom will push oil over absorbent booms; optimal sea-weather condition for usage is typically Beaufort Scale #2 or less. |
| **Recycled Content** | : | 100% Post-Industrial Recycled Polypropylene Filler |
